

# REDMAN REPAIR KIT HOW-TO GUIDE

## RedMan Training Gear

RedMan Training Gear empowers law enforcement, corrections, military, and security professionals to train harder and more realistically than any other gear on the market.

Our gear is tough and durable, but with repeated use there may come a time when you need to make a repair. In this guide, we will review how to properly repair your RedMan gear.

# REPAIR KIT COMPONENTS

SEE VIDEO [↗](#)

The RedMan Repair Kit allows wearers to easily repair their gear. Specifically developed for use with RedMan WDS and XP products, you can repair your gear on the spot in minutes.

## The RedMan Repair Kit Includes:

- Repair Instructions
- Replacement Velcro
- One 2oz Tube of Adhesive
- Wooden Applicator Sticks
- Red or Bronze Vinyl Straps
- Clear Vinyl Straps
- Extender Strap

# HOW TO FIX DETACHED VELCRO

SEE VIDEO [➔](#)

Take the glue and squeeze onto wooden applicator.

Smooth glue onto detached area.

Secure velcro back in place.

Finish smoothing glue along the seams to seal it.

Let dry for 3-5 minutes.

## HOW TO FIX TORN GEAR

SEE VIDEO [➔](#)

Cut a piece of vinyl large enough to cover the tear.

Take the glue and apply to the rough side of the vinyl.

Place the vinyl over the torn area and secure in place.

Let dry for 3-5 minutes.
